

CARBIDE TIPPED CIRCULAR SAW BLADES

THIN KERF

The Intimidator™ Blade Series is a Thin Kerf Carbide Tipped Circular Saw Blade that is designed to cut very fast and clean, as it is cutting less material. They have an alternate top bevel tooth grind for the cleanest cutting. All thin kerf blades have special engineered body slots to dissipate heat and a unique shoulder design for improved cutting performance. New anti-friction coating reduces friction and heat build-up.

DESCRIPTION	ITEM NO.	SIZE	TEETH	ARBOR	PRICE EACH

	CTCB-TK-1280	12	80	1"	44.66
	CTCB-TK-1430	14	30	1"	77.16
	APPLICATION				
For fast, clean crosscutting, ripping and mitering in solid wood, plywood, particle board, chip board, etc. This blade is designed for professional and industrial applications.					

CARBIDE TIPPED CIRCULAR SAW BLADES

STANDARD KERF

Roc-Edge® Standard Kerf Carbide Tipped Circular Saw Blades are designed for heavy duty construction work. They are manufactured with the finest “tungsten” carbide tips and an alternate top bevel tooth design. All carbide tipped blades can be resharpened and/or retipped for longer cutting life.
